

YOUR EASY-TO-USE MANAGEMENT PORTAL

The Customer Portal

Our portal gives you the power to manage and monitor your SIP services, without the hassle of contacting your service provider to make minor adjustments. This user-friendly admin tool gives you the ability to track usage trends and make changes on-demand and in real-time.

Management

Whether you're adding trunk capacity, enabling call forwarding or updating your E911 address, you can make changes easily from any device through the portal.

Continuity

Easily forward your SIP Trunk to another trunk or external number so you never miss a call in light of power outages, equipment maintenance or travel plans.

Insight

View live concurrent trunk utilization, telephone number usage or trunk group call counts with the click of a button with exportable pre-built and custom reports.

Administration

Search and reserve regular and toll-free numbers from our database. You can also change ring-to (DNIS) numbers and edit caller ID information with ease.

Features and Functions

Security

Manage portal access by assigning specific roles and privileges to all users and monitor audit logs and all changes made within a certain time period.

Reporting

Access 24/7 technical support at your fingertips. In the event of an outage, you're set up for automatic failover through our Tier III redundant data center.

Analytics

Get instant visibility into your service usage. You can monitor trunk utilization by date or time to gain valuable insight. Download reports as a CSV file or PDF.

Get to Know TelNet Worldwide

Too many businesses struggle with communication technology that's ineffective and frustrating. **We're changing that.** Our empowering, cloud-based solutions simplify the way you communicate and collaborate.
