

REPLACE YOUR COPPER POTS LINES

Say goodbye to outdated copper phone lines and hello to reliable, cost-effective TelNet Cellular POTS! As copper phone lines retire, your critical systems are at risk of service disruptions and escalating costs. Our cellular-based system ensures uninterrupted service for your elevators, point-of-sale systems, alarms, and more, providing an uptime certified solution to keep your operations running smoothly.

Pricing Stability

We understand the increasing costs of legacy POTS lines. With TelNet's Cellular POTS, lock in your rate and you'll never have to worry about it increasing unexpectedly.

Redundant

Enjoy the benefits of having a fully redundant POTS line. From the multi-SIM card cellular connection, to built-in battery back-up, you'll never have to worry about uptime.

Intelligent Design

Fire Systems, Alarms, Elevators, Point of Sale Systems, Security Gate Door Access, Panic Buttons, Modem/Out of Band Management, Voice and Fax.
